# Custom-made Decorative 3D Wave Wall Interior Panels

Woodstock Wave Wall architectural panels offer a dramatic alternative to traditional flat wall panels. There are a variety of designs, colors, textures, sizes, and finishes that allow the design professional total freedom of expression during the creative process. These decorative wall panels are exquisite expressions of artistic form and provide a continuation of nature to free-flowing open spaces that are inviting pieces of art. All of the panels are custom made to your specifications.

Wave panels are made of medium density fiberboard (MDF) and can be finished with literally hundreds of colors and patterns. They are UV resistant and color lasting, moisture resistant, and are easy to install. The durable surface is also washable. All panels match on all four edges so there is no finishing required. They can be installed horizontally or vertically. They can be installed permanently on the wall or as temporary modular panels. Trim can be added to create the look of inlaid panels. Custom sizes are available.

Combine 3D wall panels with creative lighting and the results are spectacular. With strong 3D effect, 3D wall panels can bring to life luxurious surroundings and make your project elegant in style. The focus with this product line is not what is, but what could be. Choose from our stock design patterns or bring in your inspirations and ideas to our CNC programmer, we are able to create just about anything that your imagination can envision.

**Accent panels can also be customized with your company logo.**

Achieve outstanding designs in every interior space. From stunning ballroom and lobby walls to functional surfaces for kitchens and restrooms. They can be used as accent or focal point pieces in every type of interior space. They can also be used as panels for furniture components. The possibilities are truly endless.
